

Client Feedback/Testimonial

Date : 23/12/2024

TO WHOMSEVER IT MAY CONCERN

We have been using the **REDF (Radial Edge Disc Filter) system** for our application of separation of activated charcoal from oil to remove the odour and achieve high clarity. The system has proven to be highly effective, offering specific benefits such as efficiency, clarity, cost-effectiveness.

The back washable design has significantly reduced operational costs, labour requirements, and downtime. Its ability to provide clear filtration in a single pass has made it an indispensable part of our process.

We appreciate the innovative technology and reliable support provided by **SS Filters Pvt Ltd, Turbhe Navi Mumbai** and look forward to continued collaboration.
